| NURS 8020- Project Preparation Course | 1 credit (45 practicum hours) | - Obtain Faculty Advisor  
- Obtain Clinical Site and Clinical Mentor  
- Formulate PICO related to clinical problem of significance  
- Create Evidence table surrounding your PICO  
- COMIRB and IHI modules  
- Complete AIM of project | Set up students for a successful project. Ensuring adequate problem, key stakeholder buy-in, evidence behind interventions. Ethical considerations and preparation for IRB review. | 6107: You learned how to create an evidence table and intervention table. You will thought about your area of interest for your project.  
*You will need this to create your evidence table for your project.*  
6109: You completed a synthesis of a body of evidence.  
*You will use this synthesis to make clinical decisions on how you are going to shape your project.*  
6303: You looked at population health and prevention, as well as |
environmental health, incidence and prevalence.
*You are focusing on a population in your project, not a specific patient.
* You will need all these pieces for the background and significance of your project.

6800: You learned to ground yourself in your values to help shape your decision making. You reflected on your leadership and developed a personal leadership theory.
*You will need this throughout your whole project!

| NURS 8030- Project Practicum I | 4 credits (180 practicum hours) | Obtaining baseline information, using QI and PE methods appropriately to assess problems and interventions. Ensuring final project proposal appropriate and not deemed as research. | 6108: You started to learn about QI methodology here. *This will link to the QI methodology in your project and how to apply it.  
6109: QI methods reinforced here. *Use QI as a means to move evidence into practice.  
6303: Program Evaluation and Community |

| NURS 8040  | Project Practicum II       | 3 credits (135 practicum hours) | -Discussion of nursing and change theories  
-Data collection and planning  
-Run charts and control charts | Continue to run project and reflect on processes as well as focus on data collection during project 6108: You started to learn about QI methodology and statistical analysis here.  
*This will link to the QI methodology in your project and how to apply it.  
*You will also think about how you are going to apply statistical analysis information in your final project course. |
|             |                            |                           |                                                                               |                                                                                 |
| NURS 8045  | Project Seminar II         | 1 credit (Didactic course)| -Deep dive into small cycles of change  Deconstruction and Exploration of one change cycle and what that entails | 6109: QI methods reinforced here.  
*Use QI as a means to move evidence into practice.  
6303: Program Evaluation and Community partnerships were addressed here.  
*You can apply this methodology to your project. |
| NURS 8050  | Project Practicum III      | 4 credits (180 practicum hours) | -Reflection on leadership  
-Data collection and completion | Completion of project with deep reflection on the personal and 6108: Statistical methods were learned here. |
- Analysis and Discussion of data
- Scholarly paper completion
- Final project presentation

professional growth as well as the lessons learned. The culmination of all courses together.

*You will apply these skills during the final analysis of your project.

**6800**: As stated above, you grounded yourself in your values to help shape your decision making. You reflected on your leadership and developed a personal leadership theory. In addition, you developed a business plan.

*You will apply your financial skills in this last project course when you look at the potential costs of your project.

*You will now reflect on how you used this throughout your whole project!

| 6107: Research and Quality Improvement Methods: Principles of Evidence |
| 6108: Inferential Statistics and Quality Improvement: Applying the Evidence |
| 6109: Evidence Based Practice: Evaluating the Evidence |
| 6303: Epidemiology |
| 6800: Innovative Leadership and Finance Management |
