UGANDA

POPULATION HEALTH CLINICAL EXPERIENCE: UGANDA!

This is a required clinical experience as a part of the final semester for undergraduate nursing students focusing on Population Health. Students are required to complete 64 hours of patient care exploring the importance of providing preventative health education activities with the goal of reducing barriers to keeping populations healthy. Enhancing skills related to cultural responsiveness/sensitivity are key components of this unique learning opportunity. The course expands the learners' ability to collaborate with diverse communities to improve population health outcomes.
